

Prologue, Entr'acte, Postlude

Omar Daniel

for soprano, trumpet in B flat,
with optional trumpet in C (or clarinet in B flat), snare drum
and electronics

for Lawrence Cherney and Soundstreams,
in celebration of
the 30th anniversary fo Soundstreams

commissioned by Soundstreams,
with the generous financial assistance of
The Ontario Arts Council

Prologue

An die Musik *for soprano and live electronics*

The soprano is to perform this song as a solo. The electronics are controlled by a technician, who follows the soprano in the score and triggers certain effects. The 'PCM81' staff indicates the continuous control (CC) values linked to specific effects on the composer's PCM81. The effects utilized are delay, resonant filtering and pitch modulation.

Entr'acte

for trumpet solo and live electronics
(with optional 2nd trumpet in C or clarinet in B flat
and snare drum)

Entr'acte uses live electronic harmonization (four voice) and delay.
The PCM81 staff includes information on the control of the Lexicon
PCM81 Digital Effects Processor using external controllers (indicated
as CC) as well as a MAX patch available from the composer). The B flat
Trumpet player performs this piece as a solo, and can be free to interpret
the score appropriately. The electronics are triggered by a technician, and
the resulting electronics sounds are indicated for reference on the
'Electronics' staff.

Postlude

for solo soprano and live electronics

Postlude uses the principle of live multitracking. The soprano sings 'pass 1' of the song. This pass is recorded. Pass 1 is then played back through loudspeakers, and the soprano then sings 'pass 2' in strict counterpoint with the playback of pass 1. Pass 2 is simultaneously recorded. Pass 1 and pass 2 are then played back (synchronized) through loudspeakers, and the soprano sings 'pass 3' in strict counterpoint with the playback of pass 1 and pass 2. Pass 3 is simultaneously recorded. Then, the piece can be freely 'arranged': the soprano could be tacet for one rendition of recorded passes 1,2 and 3, then sing pass 2 with only the recorded pass 1, then sing pass 1 with the recorded pass 3, etc. The number of 'variations' of the song is up to the performer and technician.
